Who Is This Vendor Assessment For?

NelsonHall's software testing vendor assessment for Atos is a comprehensive assessment of Atos' software testing offerings and capabilities designed for:

- Sourcing managers monitoring the capabilities of existing suppliers of IT services and identifying vendor suitability for software testing services
- Vendor marketing, sales and business managers looking to benchmark themselves against their peers
- Financial analysts and investors specializing in the software testing sector.

Key Findings & Highlights

Atos has grouped its career tester activities into Atos Global Testing (AGT):

- AGT is a unit within Systems Integration (along with SAP Services, Solutions, application management, Oracle Microsoft, Mobility, Information Management, Business Intelligence, Analytics, and engineering services)
- Systems Integration is itself a division of the larger Consulting & Systems Integration (C&SI) Strategic Business Unit (SBU).

Before 2013, AGT was a virtual testing service line across different Atos units (Managed Services and C&SI). In 2013, AGT became a full testing service line with responsibility over P&L, solutioning, delivery, and portfolio management. As part of this change, it identified career testers across the firm, which very significantly increased the number of its career testers.

Scope of the Report

The report provides a comprehensive and objective analysis of Atos' software testing offerings, capabilities, and market and financial strength, including:

- Analysis of the company's offerings and key service components
- Revenue estimates
- Identification of the company's strategy, emphasis and new developments
- Analysis of the profile of the company's customer base including the company's targeting strategy and examples of current contracts
- Analysis of the company's strengths, weaknesses and outlook.
