

# Process Discovery & Mining Technology Evaluation

## Kryon

### Report Abstract

May 2020

Bailey Kong

Digital Technology Analyst

NelsonHall

10-pages

### Contents of Full Report

1. Background
2. Revenue Summary
3. Key Offerings
4. Delivery Capability
5. Target Markets
6. Strategy
7. Strengths & Challenges
8. Outlook

## Who is This Vendor Assessment For?

---

NelsonHall's Process Discovery & Mining Technology Evaluation, provides an assessment of Kryon's process discovery & mining platform designed for:

- Sourcing managers monitoring the capabilities of existing suppliers of Process Discovery & Mining platforms and identifying vendor suitability for RFPs
- Process reengineering and RPA and intelligent automation center of excellence personnel evaluating process discovery & mining platform capability
- Vendor marketing, sales, and business managers looking to benchmark their platforms against their peers
- Financial analysts and investors covering intelligent automation and process discovery & mining platforms.

## Key Findings & Highlights

---

Kryon offers Process Discovery, a tool for process discovery (task mining) user desktop interactions that offers:

- Data collection
- Process analysis
- Process improvement.

To collect data, Kryon Process Discovery has a desktop observer tool that passively records the user interactions on the desktop, meaning the desktop user does not manually start or stop recordings.

Process Discovery being one tool in Kryon's Full-Cycle Automation Suite, can export a proprietary automation file that can be imported into Kryon Studio for automation development.

Kryon's planned functionality to Process Discovery will keep pace with client expectations. The company is acknowledging the market shifting towards true DTO, using both business data and user interaction data, with its plans to integrate transaction logs to Process Discovery.

## Scope of the Report

---

The report provides a comprehensive and objective analysis of Kryon’s process discovery and mining capabilities, covering Kryon Process Discovery’s functionality for:

- Data collection
- Process analysis
- Process improvement
- Process monitoring
- Administration.

This report also assesses Kryon’s product development strategy and strengths and challenges.
