Who Is This Vendor Assessment For?

NelsonHall's Managed Security Services profile on Unisys is a comprehensive assessment of Unisys' offerings and capabilities, designed for:

- Sourcing managers monitoring the capabilities of existing suppliers of managed security services and identifying vendor suitability for security services RFPs

- Vendor marketing, sales, and business managers looking to benchmark themselves against their peers

- Financial analysts and investors specializing in the IT services sector.

Key Findings & Highlights

This NelsonHall vendor assessment analyzes Unisys' offerings and capabilities in managed security services.

Unisys has a long history in both cybersecurity and physical security services, particularly around identity management services (for establishments such as airports and ports, and defense and intelligence agencies).

In July 2016, Unisys relaunched its security event and log management offering around LogRhythm.

One new service with the LogRhythm partnership is security monitoring, a multi-tenant monitoring solution, available worldwide but currently delivered from the U.S. and Europe. The reasoning behind this move was the LogRhythm SIEM supporting more advanced security intelligence services. Unisys considers the LogRhythm platform to be a next generation intelligent SIEM. LogRhythm has also been integrated into Stealth.

Scope of the Report

The report provides a comprehensive and objective analysis of Unisys' managed security services offerings and capabilities, and market and financial strengths, including:

- Identification of the company's strategy, emphasis, and new developments

- Analysis of the company's strengths, weaknesses, and outlook

- Revenue estimates

- Analysis of the profile of the company's customer base including the company's targeting strategy and examples of current contracts

- Analysis of the company's offerings and key service components

- Analysis of the company's delivery organization including the location of delivery locations.
