Key Findings & Highlights

NelsonHall's "Global Document Management BPS Market Forecast: 2016- 2020" consists of 45 pages. It is a comprehensive forecast of the document management BPS market and is complemented by NelsonHall's self-service forecasting facility which enables users to download forecasts and vendor shares tailored to their needs across any combination 39 geographies, and 39 industry sectors.

The document management market continues to be impacted by the reduced emphasis on paper and increasing emphasis on use of digital media and especially smart phones.

However, this increasing adoption of digital and mobile as the preferred means of communication is creating opportunities for paper conversion to digital and for scan-on-demand services in support of existing paper ar The CMS market continues to grow steadily, with high growth in sales generation related activities and social media outsourcing counterbalancing more modest growth in customer care.
