Contents of Full Report

1. Background
2. Revenue Summary
3. Key Offerings
4. Delivery Capability
5. Target Markets
6. Strategy
7. Strengths & Challenges
8. Outlook

Who is This Vendor Assessment For?

NelsonHall's Process Discovery & Mining Technology Evaluation, provides an assessment of Skane's process discovery & mining platform designed for:

- Sourcing managers monitoring the capabilities of existing suppliers of Process Discovery & Mining platforms and identifying vendor suitability for RFPs
- Process reengineering and RPA and intelligent automation center of excellence personnel evaluating process discovery & mining platform capability
- Vendor marketing, sales, and business managers looking to benchmark their platforms against their peers
- Financial analysts and investors covering intelligent automation and process discovery & mining platforms.

Key Findings & Highlights

Skane is a "visualization and continuous optimization of work" company with a goal of driving process optimization through not only automation, but precision training, process conformance, and operational metrics. Towards that goal, the company's CPX platform offers:

- Data collection
- Process analysis
- Process improvement
- Process monitoring.

Skane uses a computer vision (CV) engine to map out processes from recorded tasks, and is also capable of determining the start and stop actions automatically.

Skane CPX includes three pre-built dashboards.

Skane is focusing on bringing two-way communication between process owners and process participants.

Scope of the Report

The report provides a comprehensive and objective analysis of Skans process discovery and mining capabilities, covering CPX platform's functionality for:

- Data collection
- Process analysis
- Process improvement
- Process monitoring
- Administration.

This report also assesses Skans product development strategy and strengths and challenges.
