Who Is This Vendor Assessment For?

NelsonHall's Managed Security Services profile on TCS is a comprehensive assessment of TCS' offerings and capabilities designed for:

- Sourcing managers monitoring the capabilities of existing suppliers of managed security services and identifying vendor suitability for security services RFPs

- Vendor marketing, sales, and business managers looking to benchmark themselves against their peers

- Financial analysts and investors specializing in the IT services sector.

Key Findings & Highlights

This NelsonHall vendor assessment analyzes TCS' offerings and capabilities in managed security services.

In 2014, to address rising global cybersecurity issues, TCS consolidated its security service lines and launched a separate horizontal unit, now called Cyber Security, offering a full play of security services and solutions including global consulting services, professional services, and managed security services.

In October 2015, TCS partnered with Symantec to build analytics-driven security services. Through the partnership, TCS and Symantec are developing joint offerings on Symantec's product suite.

In October 2017, TCS partnered with Palo Alto Networks to offer public cloud security services using Palo Alto Networks' Next Generation Security Platform.

Scope of the Report

The report provides a comprehensive and objective analysis of TCS' managed security services offerings and capabilities, and market and financial strengths, including:

- Identification of the company's strategy, emphasis, and new developments

- Analysis of the company's strengths, weaknesses, and outlook

- Revenue estimates

- Analysis of the profile of the company's customer base including the company's targeting strategy and examples of current contracts

- Analysis of the company's offerings and key service components

- Analysis of the company's delivery organization including the location of delivery locations.
